The following data table shows data collected in a small medow from 1990 to 2014. Both the number of overall rabbits and the number of carrot plants/ square mile.

| Year |  |
| ---: | ---: |
| Rabbits |  |
| 1990 | 150 |
| 1992 | 170 |
| 1994 | 155 |
| 1996 | 140 |
| 1998 | 122 |
| 2000 | 113 |
| 2002 | 95 |
| 2004 | 74 |
| 2006 | 86 |
| 2008 | 90 |
| 2010 | 98 |
| 2012 | 94 |
| 2014 | 100 |

| Year | Carrots/ <br> square <br> mile |
| ---: | ---: |
| 1990 | 100 |
| 1992 | 130 |
| 1994 | 120 |
| 1996 | 100 |
| 1998 | 94 |
| 2000 | 80 |
| 2002 | 65 |
| 2004 | 68 |
| 2006 | 77 |
| 2008 | 75 |
| 2010 | 78 |
| 2012 | 82 |
| 2014 | 79 |

Instructions: Make a graph from the following data. It MUST take up the whole area of the paper you are using, contain labeled axis, a title and two colors.

Furthermore, you must write two observations and two inferences about the data in the graph (What do you think happened to the rabbits in the medow?)
